

Noblelift straddle trucks PSE and PS range — technical parameters

Straddle electric stacker

Straddle stackers are designed for handling pallets where a classic stacker with standard support arms cannot be used. Adjustable straddle legs allow lifting a wide range of pallet types and other loads. The manufacturer designates them as Straddle Leg Electric Pedestrian Stackers.

Key features

- Straddle design

For various pallet sizes — forks straddle the load from the side

- Adjustable legs

Support arm spacing can be set according to the load type

- Li-Ion battery

Modern lithium-ion drive with low operating costs

- Same strengths as PSE and PS

All the same advantages as in the PSE and PS range specifications
